## TECHNICAL EXPERIENCE

**Flatiron Attendance Tracker** - A React Js, Express, and Rails application that lets students sign in based on location

- + Leveraged JSON Web Tokens to build custom authentication with third party client.
- + Integrates Redux to handle application state
- + Utilized third party components to build reusable calendar UI

**Janus** - An Ember client-side application with a Rails API that makes it easy to keep track of projects and tasks

- + Designed and implemented PostgreSQL database for Rails API
- + Incorporates drag and drop functionality using custom Ember components and HTML5
- + Visualizes project subtasks using ChartJS
- + Developed a Chrome Extension that persists urls to our database in a bookmark fashion.

**QuickByte** - A Rails application to allow businesses and organizations to make, share and join lunch plans

- + Incorporated the Google Maps API and the Geocoder gem to show a map of a given lunch spot.
- + Utilized ActionMailer to send confirmation emails for user signup and admin notifications.
- + Used AJAX to minimize page load speeds and provide a more seamless user experience.
- + Leveraged Bootstrap and jQuery to make an intuitive and responsive application.
